and extends it to consider how assessment contributes to social justice within and through higher education jan mcarthur invites the reader to rethink familiar positions on assessment and fairness and seeks to explore the full complexity of a critical theory inspired notion of social justice she positions her work in contrast to more procedural approaches to social justice such as john rawls s influential theorisation of social justice in contrast mcarthur draws on the work of third generation critical theorist axel honneth and takes inspiration from honneth s three realms of mutual recognition in order to reconsider the nature of assessment relationships and practices a further theoretical strand is introduced in the form of social practice theory and particularly the work of theodore shatzki mcarthur provides a theoretically rigorous understanding of assessment as a social practice and as a vehicle both for and against social justice together with critical theory this work enables a realizable vision of an alternative approach to assessment in higher education where the underlying aim is greater social justice mcarthur argues that students must be nurtured to recognise the social contribution that they can make as a result of engaging with knowledge in higher education rather than defining their achievements in terms of a mark grade or degree classification
