the book begins with the momentous task of demolishing the prejudices attached with the phrase founding fathers that has held an immense sway over constitutional interpretation it shows that women members of the indian constituent assembly had painstakingly co authored a constitution that embodied a moral imagination developed by years of feminist politics it traces the genealogies of several constitutional provisions to argue that without the

interventions of these women framers the constitution would hardly have a much poorer document of rights and statecraft that it is situating these interventions in the larger trajectory of indian feminism in which they are rooted in the nationalist discourse with which they perpetually negotiated and in the larger human rights discourse of the 1940s the book shows that the women members of the indian constituent assembly were much more than the founding mothers of a republic
