many people in organizations resent internal control and risk management these two processes representing unwelcome tasks to be completed for the benefit of auditors and regulators over the last few years this perception has been heightened by the disastrous implementation of section 404 of the

sarbanes oxley act of 2002 which is generally regarded as having been too expensive for the benefits it has brought this important book offers a way of improving this prevailing perception and increasing the value of control and risk management by bringing creativity and design skills to the fore the value of risk and control activities is often limited by the value of the control ideas available and so matthew leitch provides an arsenal of 60 high performance control mechanisms these include several alternative ways to design controls and control systems as well as providing controls for monitoring and audit controls for accelerated learning and techniques for finding and recovering cash this design material is combined with insights into the psychology of risk control strategies for encouraging helpful behaviour and enabling change and a surprisingly simple integration of internal control with risk management the book is realistic practical original and easier reading than most in the field the material is not specific to any one country and has international appeal for internal auditors and all those concerned with risk management corporate governance and security
