These proceedings represent the work of contributors to the 13th European Conference on Management Leadership and Governance (ECMLG 2017) hosted this year by the Cass Business School, City University of London on 11-12 December 2017. The conference chair is Dr. Martin Rich. The conference will be opened with a keynote address by Dr. Helen Rothberg from Marist College, Poughkeepsie, USA with a speech entitled 'Everything I Know About Leadership I Learned as a Bartender'. On the second day the keynote will be delivered by Dr. Amanda Goodall from City University of London on the topic of 'Why We Need Core Business Experts as Leaders'. ECMLG is a well-established platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of management, leadership and governance. At the same time it provides an important opportunity for members of the community to come together with peers, share knowledge and exchange ideas. With an initial submission of 160 abstracts after the double-blind peer review process there are 61 academic papers, 8 PhD papers and 2 work in progress papers. In these conference proceedings these papers reflect the truly global nature of research in the area with contributions from Australia, Austria, Belgium, Brazil, Canada, Czech Republic, Finland, Germany, Hungary, Iran, Ireland, Israel, Kazakhstan, Kenya, Lithuania and Malaysia.

Global warming is an increasing problem. Tropical forests are being wiped out and major upper watersheds are being degraded. Using insights provided by environmentalism, ecology and thermo dynamics, this book (first published in 1989) outlines an economic approach to the use of natural resources and particularly to the problem of environmental degradation. Edward Barbier reviews and critiques the long past of environmental and resource economics and then goes on to elaborate an economics which allows us to develop alternative strategies for dealing with the problems faced with examples drawn from Latin America and Indonesia. He not only develops a major theoretical advance but shows how it can be applied. Barbier's work is an important and relevant contribution to the discussion surrounding the economics of environmental sustainability.
