in financial risk taking trader and psychologist mike elvin explores the complex relationship between human behaviour patterns and the markets offering the reader a context in which to assess their own strengths and weaknesses as investors the book offers an apposite and uncomplicated system of skills development in the form of competences and competencies that can be applied anywhere along the continuum from casual investor to full time day trader elvin presents a comprehensive model of trading competence the mot as well as the

concepts of analysis and refutation the paramouncy principle and self sabotaging behaviours such as the santa claus syndrome and bohica effect areas covered include emotions are they functional or disabling how do the mechanisms of fear greed and panic work motivation and perception how do belief paradigms affect perception and performance what perceptual errors influence decisions to the trader s detriment information processing and risk assessment how does information overload affect stress how does stress affect investment decisions technological and mathematical anxiety why do we avoid learning the skills we most need what levels of ability are required can psychological and biological theories assist in our understanding of investors performance

science without religion is lame religion without science is blind albert einstein science offers wonderful tools to investigate the world but the world of the spirit defies rigorous study christianity offers hope for the future and salvation after our death how does a scientist accept something that cannot be studied with the techniques of his training how do we unite these apparently incompatible views of the world around us into a single system of living science and religion are both based on belief in something science believes in cause and effect that there is logic to the things that happen in the world christianity believes that god created the world and he has a plan for what happens in it atheism and agnosticism leaves us bankrupt as we approach the end of life blaise pascal said that belief in god offers such great benefits that religious non belief is not a viable way of life einstein refused to believe that that the world operates on chance he said that god does not shoot craps ministers work with scientists that seek logical answers for the teachings of the church the purpose of this book is to explain how scientific method works and why it lacks the tools to investigate spiritual events and concepts it explains the path that one scientist followed to find a belief in god and his plan for our life and hope for the future

the open air pulpit within the precincts of st paul s cathedral known as paul s cross can be reckoned among the most influential of all public venues in early modern england between 1520 and the early 1640s this pulpit and its auditory constituted a microcosm of the realm and functioned at the epicentre of events which radically transformed england s political and religious identities through cultivation of a sophisticated culture of persuasion sermons at paul s cross contributed substantially to the emergence of an early modern public sphere this collection of 24 essays seeks to situate the institution of this most public of pulpits and to reconstruct a detailed history of some of the more influential sermons preached at paul s cross during this formative period contributors include thomas dabbs ellie gebarowski shafer cecilia hatt roze hentschell anne james gerard kilroy john n king torrance kirby bradford littlejohn steven may natalie mears mary morrissey david neelands kathleen o leary mark rankin angela ranson richard rex john schofield jeanne shami p g stanwood susan wabuda john wall ralph werrell and jason zuidema
