excerpt from a manual of surgical treatment vol 5 of 7 the subject of surgery has now become so extensive that any work attempting to deal with it in an exhaustive manner must necessarily be so large and unwieldy as to be suitable only for purposes of reference or for the use of those who devote themselves exclusively to its practice in any text book of convenient size the information given in certain branches of the subject must therefore be considerably condensed and as the first essential for the beginner is to have the fullest knowledge of the nature and characters of the diseases that he has to study special stress is usually laid upon pathology symptomatology and diagnosis for the practitioner on the other hand who is already acquainted with these points the great essential is full and detailed information as to the best methods of treatment we have ourselves frequently experienced the want of detailed information especially as regards the after treatment of our cases and have had to learn the best methods of procedure from experience nothing can of course replace experience but it is often of the greatest advantage to have a detailed record of that of others upon which to base ones work it is this want that the present work is intended to supply we have tried to put ourselves in the place of those who have to treat a given case for the first time and we have endeavoured to supply them with details as to treatment from the commencement to the termination of the illness we have assumed that the reader is familiar with the nature and diagnosis of the disease and we only refer to the pathology and symptoms in so far as it is necessary to render intelligible the principles on which the treatment is based and the various stages of the disease to which

each particular method is applicable we have purposely avoided attempting to give anything like a complete summary of the various methods of treatment that have from time to time been proposed to do so would merely confuse the reader about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
