neurosis is not a medical condition rather it is a chronic functional disorder of the autonomic nervous system resulting from environmental conditioning which begins in the womb it is caused by the imprinting of and the continuous retrieval and repression of fear memories this imbalance interferes with the nervous system's ability to correctly respond to present sensory input and precipitates toxicosis of the autonomic nervous system the nervous system's attempts to detoxify itself results in ongoing exaggerated autonomic responses such as rage anxiety and depression neurosis can be healed by intentional fear memory retrieval in portions that are small enough to be holistically integrated this process reverses the condition of neural toxicosis thereby relieving excessive mood swings neurotic tension and the act out that is driven by this tension is also decreased in direct proportion to the amount of fear memory that is processed all of the symptoms that are presently being catalogued and grouped into separate and overlapping categories of mental illness are actually each person's unique learned responses to their automatic fear memory recall the neurotic act out is a symptom which is a projection of the constantly occurring fear response onto a present situation

sensational media coverage of groups like heaven's gate the people's temple and synanon is tinged with the suggestion that only crazy lonely or gullible people join cults cults attract people on the fringe of society people already on the edge contrary to this public perception marybeth ayella reveals how anyone seeking personal change in an intense community setting is susceptible to the lure of group influence the book begins with the candid story of how one keen skeptic was recruited by moonies in the 1970s the author herself ayella's personal experience fueled her interest in studying the cult phenomenon this book focuses on her analysis of one community in southern california the center for feeling therapy which opened in 1971 as an offshoot of arthur janov's primal scream approach the group attracted mostly middle class college educated clients interested in change through intense sessions led by licensed therapists at the time of the center's collapse in 1980 there were three hundred individuals living in the therapeutic community and another six hundred outpatients through interviews with twenty one former patients the author develops a picture of the positive changes they sought the pressures of group living and the allegations of abuse against therapists many patients contended that they were beaten made to strip before the group and to engage in forced sex forced to have abortions and give up children and coerced to donate money and to work in business affiliated

with the center the close of the center brought yet more trauma to the patients as they struggled to readjust to mainstream life ayella recounts the stories of these individuals again and again returning to the question of how personal identity is formed and the power of social influences this book is a key to understanding how normal people wind up in cults
