preface the idea to write this book dates back many years when i was a young management consultant from time to time my colleagues and i would be assigned to prepare a toolbox just as a handyman needs proper tools so do managers and consultants corporate managers often assume that good consultancies have excellent toolboxes enabling them to achieve awesome success in operational and strategic projects arguably top management consultancies are successful in managing their projects to my knowledge however such magic toolboxes do not exist my colleagues and i never managed to complete any assignment to create a toolbox because it was always more important for us to be working in the field in order to generate revenue on the other hand those few fragments of toolboxes that we did prepare were treated like secret treasures now naturally no big consultancy is willing to publish its proprietary tools thus

while i am convinced that a toolbox is necessary for both managers and consultants alike i also believe that it only can be developed outside of a consultancy albeit by someone with knowledge as to what goes on inside of consultancies there already exist many books dealing with management and strategy of course but none of them fits the aforementioned purpose as a young consultant i had many colleagues with mbas or doctorates from such famous universities as st gallen harvard insead and others
