mental imagery refers to the mental simulation or recreation of perceptual experience across different sensory modalities the exploration of mental imagery represents a new and important area within clinical psychology but arguably one still in its infancy while mental imagery has featured prominently in recent theoretical accounts of disorders as diverse as post traumatic stress disorder phobia body dysmorphic disorder mood disorders and psychosis there remains an insufficiently strong theoretical and methodological

foundation to enable comparison of the role of imagery across such different disorders the current research topic presents a diverse range of cutting edge papers focusing on investigating the underlying mechanisms and or treatment interventions associated with mental imagery in clinical disorders with the goal of helping establish those common elements most clinically relevant when investigating mental imagery the research topic comprises fifteen articles drawn from the fields of psychiatry psychology and neuroscience this is a unique collection of articles that combine different perspectives from the field of clinical psychology with more diverse perspectives drawn from the wider literature on mental imagery the original research studies and theoretical articles presented are organised around four main chapters that cover imagery and eye movements imagery and craving imagery and autobiographical memory and imagery and clinical disorders we believe that the range of submissions presented in the research topic make a strong contribution to helping establish a theoretical and methodological foundation that can enable the effective study of imagery across different disorders and domains

Orson Welles and the unfinished RKO projects: A postmodern perspective traces the impact of legendary director Orson Welles on contemporary mass media entertainment and suggests that ironically we can see Welles's performance genealogy most clearly in his unfinished RKO projects. Author Marguerite B. Rippey provides the first in-depth examination of early film and radio projects shelved by RKO or by Welles himself while previous studies of Welles largely fall into the categories of biography or modernist film studies. This book extends the understanding of Welles via postmodern narrative theory and performance analysis weaving his work into the cultural and commercial background of its production by identifying the RKO years as a critical moment in performance history. Rippey synthesizes scholarship that until now has been scattered among film studies narrative theory feminist critique American studies and biography building a bridge between auteur and postmodern theories. Orson Welles and the unfinished RKO projects offers a fresh look at Welles in his full complexity. Rippey trains a postmodern lens on Welles's early projects and reveals four emerging narrative modes that came to define his work: deconstructions of the first person singular adaptations of classic texts for mass media explorations of the self via primitivism and examinations of the line between reality and fiction. These four narrative styles would greatly influence the development of modern mass media entertainment. Rippey finds Welles's legacy alive and well in today's mockumentaries and reality television. It was in early unfinished projects where Welles first toyed with fact and fiction and the pleasure of this interplay still resonates with contemporary culture as Rippey suggests the logical conclusion of Welles's career: long exploration of truthiness lies in the laughs of fake news shows offering an exciting glimpse of a master early in his career. Orson Welles and the unfinished RKO projects documents Welles's development as a storyteller who would shape culture for decades to come.

In the early days of television many of its actors writers producers and directors came from radio. This crossover endowed the American radio archives with a treasure trove of television documents. The collected scripts span more than 40 years of American television history from live broadcasts of the 1940s to the late 1980s. They also cover the entire spectrum of television entertainment programming including comedies soap operas dramas westerns and crime series. The archives cover nearly 1,200 programs represented by more than 6,000 individual scripts. Includes an index of personal names program and episode titles and production companies as well as a glossary of industry terms.

In this unique and important study of what it means to be a Mongolian in today's world Dr. Uradyn E. Bulag draws on a vast amount of illuminating research to argue that all Mongols are in fact confronted with a choice between a purist racialized nationalism which they inherited from the Soviet discourses of the past and a more open adaptive and inclusive nationalism which would accept diversity hybridity and multiculturalism. The book calls into question the idea of Mongolia as a homogeneous place and people and urges that unity be sought through a country-wide acknowledgment of diversity.
