marine ecosystems are diverse habitats endowed with physical chemical and geographical variations in the ecosystems where the gradation from highly productive organisms to highly specialized organisms exists india has almost 7 517 km long coast of which 5 423 km belongs to the peninsular india and around 2 094 km to the andaman nicobar and lakshadweep islands the mainland coast of india consists of 43 sandy beaches 11 rocky coast including cliffs and 46 mudflats or marshy coast this massive coastline of india supports the human population tremendously through marine resources nearly 250 million people live within the fringe of 50 km from the coastline of india hence a vital role in india s economic growth is played by the ecological services that the marine and coastal ecosystems provide the mpan marine protected area network in india regulates the natural marine resources to conserve the depleting biodiversity for the betterment of people that are dependent on these coastal resources moreover gujarat state is bestowed with one of the longest coastline of india 1 650 km the gulf of kachchh gujarat is india s first marine national park mnp contributing to the ecological importance of the state s coastal ecosystem exhibiting the most vulnerable biological diversity in intertidal mudflats gulf bays wetlands mangroves salt marshes coral reefs beaches dunes and estuaries the book mangroves structure functions ecology

and biodiversity focuses on environmental and ecological studies of gulf of kachchh western gujarat india in relation to eutrophication biotic components structure and functions of mangroves and biomonitoring of metals the book covers an in depth study of surface water and bottom sediment quality diversity density abundance commonness rarity of shells ecological structure and functions of mangrove environment including composition population dynamics community structure of floral and faunal species phytochemical constituents of selected mangrove tree species and biomonitoring of nutrients in avicennia marina the book would unquestionably be the need of an hour for mangroves managers marine conservationists and policy makers or decision authorities to prevent the unrestrained exploitation of marine biodiversity destruction of potential mangrove habitats and uncontrolled interactions of man and technology with mangrove ecosystems around the world

the 2018 agreement to prevent unregulated high seas fisheries in the central arctic ocean caof agreement is a unique international treaty it sets up conditions for potential future commercial fisheries in the central arctic ocean furthered by climate change until ecosystem dynamics are well understood as a product of balancing interests of various stakeholders after a multi year drafting process the agreement protects both fish stocks and the environment based on international maritime law scientific research and principles of international environmental law such as the precautionary approach it sets a precedent for future fisheries agreements

this document contains the proceedings of the imcsnet s first ever virtual gfetw which took place online on 13 and 14 july 2021 nearly 600 monitoring control and surveillance mcs practitioners from around the world as well as other fisheries stakeholders and organizations registered to participate in the online conference which consisted of a schedule of speakers presentations panel discussions and interactive discussion rooms in addition the virtual platform software utilized for the gfetw facilitated the ability for participants to create and use private meeting

rooms for networking sessions as well as an online chatting function one of the primary focuses of the imcsnet is to increase fisheries mcs cooperation and collaboration between member countries especially with and between developing country members the virtual conference included participants from both developing and developed nations as well as stakeholder organizations involved in fisheries mcs the overall theme of the virtual gfetw was illuminating the unknowns global cooperation to eliminate the u s from illegal unreported and unregulated iuu fishing the gfetw focused on an interactive format highlighting three interactive panel discussions on emerging mcs areas of interest or challenges the event also included mcs papers presentations and short videos relevant to one of the following four gfetw themes cooperation and partnerships risk assessment and analysis technology as an enabler and transparency

the paris 4 conference which took place at the national museum of denmark in 2011 attracted over 100 participants from 18 countries delegates presented and discussed the latest developments in the field of preserving archaeological remains in situ these proceedings explore four major themes rates of degradation in archaeological remains and the limits of acceptable change the techniques and duration of monitoring on archaeological sites the role of multinational standards when the sites and national legislations are so variable reviewing the effectiveness of in situ preservation after nearly two decades of research a special issue of conservation and management of archaeological sites vol 14 nos 1 4

as technological development and diffusion have greatly increased the resources states can recover from maritime space the stakes of these conflicts have grown nowhere is this clearer than in east asia this book examines how technological change and diffusion impact east asian maritime conflicts and approaches for conflict management and resolution

addressing the management of genetic resources this book offers a new assessment of the contemporary access and benefit sharing abs regime debates about abs have moved on the initial focus on the legal obligations established by international agreements like the united nations convention on biological diversity and the form of obligations for collecting physical biological materials have now shifted into a far more complex series of disputes and challenges about the ways abs should be implemented and enforced these now cover a wide range of issues including digital sequence information the repatriation of resources technology transfer traditional knowledge and cultural expressions open access to information and knowledge naming conventions farmers rights new schemes for accessing pandemic viruses sharing dna sequences and so on drawing together perspectives from an interdisciplinary range of leading and emerging international scholars this book offers a new approach to the abs landscape as it breaks from the standard regulatory analyses in order to explore alternative solutions to the intractable issues for the access and benefit sharing of genetic resources addressing these modern legal debates from a perspective that will appeal to both abs scholars and those with broader legal concerns in the areas of intellectual property food governance indigenous issues and so on this book will be a useful resource for scholars and students as well as those in government and in international institutions working in relevant areas
