a realist particle based view of quantum theory where the wavefunction no longer plays a central role offers a clear commonsense alternative to dominant metaphysical views

motivation expert james fell teaches readers how to skip the hard part and go directly from intention to committed action after years of helping people change james fell had a sudden insight about sudden insight significant life change doesn't often come from just putting one foot in front of the other carefully observing and altering habits slogging through baby steps toward new behavior rather the research reveals that serious life turnaround usually happens in a moment with a flash of inspiration epiphany arrives like a lightning strike rapidly shifting the recipient of such enlightenment onto a new path that creates a better life motivational psychology has traditionally focused on slow and steady gradual improvement over time to reach a desired goal whether it's weight loss career change battling addiction or success in relationships we've been told since toddlerhood that the tortoise beats the hare but through compelling science and powerful stories james fell shows us that the hare has the edge overwhelming desire can be awakened fast and furiously when you learn to become attuned to that sensation of sudden awakening a new path can be followed almost effortlessly because it feels like destiny everyone has the ability to experience the lightning strike the holy sh!t moment will teach you how to create a life changing epiphany and go

directly from intention to action

even in the third decade of the twenty first century it is still harder for women to make a career in science than men two centuries ago however at the beginning of the nineteenth century when science as we know it was just getting started the situation was far worse then the very notion of a female scientist would have been regarded as something of an oxymoron from bestselling and award winning science writers john and mary gribbin against the odds highlights the achievements of women who overcame hurdles and achieved scientific success although not always as much as they deserved in spite of male prejudice as society changed over about 150 years from the middle of the nineteenth century to the end of the twentieth century there is eunice newton foote who discovered the carbon dioxide greenhouse effect chien shiung wu who discovered the law which allows matter to exist in the universe today and barbara mcclintock who discovered how genes turn on and off with a foreword from astrophysicist jocelyn bell burnell this book is not only a cautionary tale about the stifling effects of prejudice against women in science but is a celebration of those who achieved success against the odds and an inspiration for the next generation

as the british french and spanish atlantic empires were torn apart in the age of revolution portugal steadily pursued reforms to tie its american african and european territories more closely together eventually after a period of revival and prosperity the luso brazilian world also succumbed to revolution which ultimately resulted in brazil's independence from portugal the first of its kind in the english language to examine the portuguese atlantic world in the period from 1750 to 1850 this book reveals that despite formal separation the links and relationships that survived the demise of empire entwined the historical trajectories of portugal and brazil even more deeply from constitutionalism to economic policy to the problem of slavery portuguese and brazilian statesmen and political writers laboured under the long shadow of empire as they sought to begin anew and forge stable post imperial orders on both sides of the atlantic

most of us walk through each day expecting few surprises if we want to better ourselves or our lives we map out a path of gradual change perhaps in therapy or a 12 step group university of new mexico psychologists william miller and janet c de boca were longtime scholars and teachers of this approach to self improvement when they became intrigued by a different sort of change that was sometimes experienced by people and often described as a bolt from the blue or seeing the light when they placed a request in a local newspaper for people's stories of unexpected personal transformation the deluge of responses was astounding these compelling stories of epiphanies and sudden insights inspired miller and c de boca to examine the experience of quantum change through the lens of scientific psychology where does quantum change come from why do some of us experience it and what kind of people do we become as a result the answers that this book arrives at yield remarkable insights into how human beings achieve lasting change sometimes even in spite of ourselves drs miller and c de boca began their collaborative research on quantum change in 1990 and this book is the first full report of their work
