this timely book offers a raw critique of the current educational issues and debates alongside teacher hacks to provide teachers trainee teachers and educators with a plethora of stimulating material to ignite curiosity maintain passion and culture creativity in the classroom made in partnership with academics and primary school teachers working on the frontline from around the globe this book is threaded with honest practitioner voices as the big educational issues are boiled down and explored chapters cover day to day organisation such as planning subject knowledge setting

homework and behaviour management strategies right through to considering how we can best support children's mental health and staff well being as well as including critical questions to encourage reflection throughout the book offers insights into meaningful experiences such as teaching overseas taking on responsibility roles in schools considering how teachers can become educational researchers for transformative change engaging with parents and carers deploying teaching assistants whether trainee teachers early career teachers or established practitioners this book provides insight into trialled tips and techniques for shaping pedagogy in the classroom a modern well resourced guide as we emerge from the global covid 19 pandemic

the main purpose of this research topic is to analyze and identify the main family and contextual variables that are involved in the process of carrying out homework this will require studying the role played by teachers students and families in order to ensure that schoolwork is a useful learning tool although the role of the student is obviously crucial in homework research has focused on the cumulative time spent by the student carrying out homework however the time spent on homework is not in itself evidence of the student's involvement nor is time spent indicative of quality time indeed an excess of time can sometimes denote low competence in a field of knowledge while spending less time on homework could be indicative of high competence it is more likely that a high dedication of time spent on homework reflects high motivation or comprehension deficits rather than commitment to learning or academic motivation in tandem with the role of the student teachers as responsible for prescribing homework assignments for students also become central players in the process of completing homework assignments the decisions that teachers make about homework prescriptions and the amount and type of tasks they set will determine to a large extent the quality of the homework process including the student's motivation and the student's level of engagement with homework furthermore the fact that homework is useful interesting and motivating for students will depend on how the teacher prescribes those tasks and the connection established with classroom learning teacher feedback also acquires particular relevance for this point by helping the students to accurately estimate the quality of their progress and overcome the difficulties they may have encountered in carrying out their homework lastly the effectiveness of teacher feedback depends on its contribution to the student's educational progress and how that student will perform in the future in addition to the student who performs the task and the teacher who prescribes and corrects it we must not lose sight of parents role although there are discrepancies regarding the role that parents play in relation to homework it is evident that their implication has important consequences not only on the final result of those tasks but also on the very process of carrying them out everything seems to indicate that the family environment and more specifically the support and feedback provided by parents is a factor that can determine the involvement of students in school duties

in this way providing emotional support encouraging children to get involved can contribute positively to improving their motivation and interest in the performance of homework the objective of this research topic is to provide researchers and professionals in psychology and education settings with some of the most recent empirical evidence regarding the homework process its prescription and correction overall we aim to cease making homework a source of conflict and controversy at the socio educational level in order to provide useful instruments for improving the quality of student learning this work was developed with the financing of the research projects edu2013 44062 p mineco edu2017 82984 p meic

filled with nuts and bolts advice on the best ways to help young people with their homework the author concentrates on the practical covering how students different learning styles and current technology inform the homework process on staff training and community outreach and on options for working more closely with both students and teachers

this workbook reinforces skills and minimizes frustration for students in any math class lab or study skills course offering a wealth of proven study tips and sound advice on note taking time management and reducing math anxiety the author makes the learning process both manageable and compelling in addition numerous opportunities for self assessment enable students to track their own progress

guides first year teachers in preparing for the first day of school classroom behavior and more
