following the companion volume the capital logic debate blunden presents a systematic presentation of the hegelian structure of the three volumes of capital it is shown that capital contains three distinct layers of structure originating from marx s reading of hegel s logic and his philosophy of right capital reflects marx s critique of the political economists

his unique appropriation of economic history and an application of the method outlined by Hegel in his logic and applied to his encyclopaedia these insights into capital are presented here for the first time

beginning with value and commodity at the start of volume I in Marx's major work and progressing step by step to the end of volume III Smith establishes in detail that capital is a systematic theory of socio-economic categories ordered according to dialectical logic at each stage in his analysis of the theory Smith makes Marx's arguments more accessible he also considers in depth the objections to Marx's employment of dialectical logic that have been formulated by Hegelians especially those presented in Klaus Hartmann's *Die Marxsche Theorie* Smith presents a persuasive case against this whole range of Marx criticisms many of which have also been proposed from non-Hegelian standpoints

offers a fresh interpretation of Marx's great work this book shows how the novelty and lasting interest of Marx's theory arises from the fact that as against the project of a pure economics it is formulated in concepts that have simultaneously an economic and a political aspect neither of these being separable from the other

models together they reconsider the most influential historical debates on capital and provide new interpretations of marx's magnum opus in light of themes rarely associated with capital such as gender ecology and non european societies the book is an indispensable source for academic communities who are increasingly interested in rediscovering marx beyond 20th century marxism moreover it will be of great appeal to students as well as established scholars interested in critique of capitalism and socialist theory

this book reclaims marx's capital from the myth of inconsistency an accessible account written for non specialist readers it shows that the inconsistencies are actually caused by misinterpretation the recent temporal single system interpretation eliminates all of the alleged inconsistencies

rosdolsky's making of marx's capital is a major work of interpretation and criticism written over fifteen years by one of the foremost representatives of the european marxist tradition rosdolsky investigates the relationship between various versions of capital and explains the reasons for marx's successive reworkings he provides a textual exegesis of marx's grundrisse now widely available and reveals its methodological riches he presents a critique of later work in the marxist tradition on the basis of marx's fundamental distinction between capital in general and capital in concrete reality the making of marx's capital was first published in 1968 as zur entstehungsgeschichte des marx'schen kapital
