from frankenstein and dracula to psycho and the chainsaw massacre horror fiction has provided our culture with some of its most enduring themes and narratives considering horror fiction both as a genre and as a social phenomenon joseph grixti provides a theoretical and historical framework for reconsidering horror and the cultural apparatus that surrounds it first published in 1989 this book looks at shifts in the genre s meaning its fascination with excess its commentaries on the categories and boundaries of culture and at interpretations of horror from psychology psychoanalysis sociology cultural and media studies terrors of uncertainty brings together a provocative range of perspectives from across the disciplines which combine to raise important questions about the relationship between fiction and society and the way in which we use fiction to resolve or evade our fears of uncertainty

first published in 1964 behaviour in uncertainty begins with an analysis of the manner in which we weigh evidence or commit ourselves to a course of action from here it is but a step of choices when life and limb are at stake as in the behaviour of motorists and pedestrians on the road or when suicide is contemplated alone or with a loved one in all these situations as in acrobatics or on the playing field there are elements of risk and hazard and in all of them the individual may suffer from one of many diseases of decision making these variations on the theme of behaviour in uncertainty are traced by the author in experimental predicaments in adventures of the imagination in moments of crisis and in the confrontation with death all this jumps to life historically when viewed against the background of divinatory practices through the ages these universal practices demonstrate man s never ending efforts to conquer the uncertainties that desert him and in particular to wrest the secrets which the future has in store this is an interesting read for students of psychology

taking a sociological approach that stresses the dynamic interaction between teachers and students brian heraud in his

book training for uncertainty originally published in 1981 explores the process by which students are prepared for a professional role at the heart of this process he argues there are numerous uncertainties expressed primarily in terms of the often polarised objectives of students and staff he traces the development of social work education and goes on to analyse the disparate attitudes among staff the way in which these influence the selection of students and their manifestation in the subsequent conflict in role playing and choice of role models experienced by those students the final part of the book is devoted to showing how students overcome such conflicts and prepare themselves for the transition from education to profession this volume will be of interest to students and researchers of sociology and social work

experiencing fear in front of the screen is a common phenomenon in childhood and a focus of public concern yet research has encountered ethical and methodological challenges and has focused largely on the effects of watching disturbing news in this innovative book this universal experience is investigated in depth via two complementary studies 1 a retrospective study of experiences related by 626 undergraduate students from eight countries and 2 a study of the current nightmares induced by watching television of 510 children in five countries the results presented in this book highlight the most common elements of fear in front of the screen more generally followed by a focused analysis of the unique features of fear that characterize different developmental stages pre school middle childhood pre teens and teenagers the rich descriptions distinguish between the negative experiences of fear versus the positive experiences of thrill and explores gender and cultural differences finally the book offers implications for media producers and policy makers as well as for parents and educators
